Akaroa. Akaroa holds 25% stake in Salmon Smolt NZ Ltd. (SSNZ), an entity operating a modern hatchery, which quarantines and consistently supplies high quality smolts (juvenile salmon) for Akaroa's farm.

2. Basis of Preparation and Statement of Compliance

Basis of Preparation

The consolidated financial statements have been prepared on a going concern basis and in accordance with Philippine Financial Reporting Standards (PFRS). This financial reporting framework includes all applicable PFRS, Philippine Accounting Standards (PAS), and Philippine Interpretations from the International Financial Reporting Interpretations Committee (IFRIC) and adopted by the SEC.

The consolidated financial statements comprise the consolidated statements of financial position, consolidated statements of comprehensive income, consolidated statements of changes in equity, consolidated statements of cash flows, and notes thereto. Income and expenses, excluding the components of other comprehensive income, are recognized in the statements of comprehensive income. Reclassification adjustments are amounts reclassified to profit or loss in the current period that were recognized in other comprehensive income in the current or previous periods. Transactions with the owners of the Group in their capacity as owners are recognized in the consolidated statements of changes in equity.

Basis of Consolidation

The interim consolidated financial statements comprise the financial statements of the Parent Company and all of its subsidiaries. As of March 31, 2020, there were no changes in the Parent Company's ownership interests in its subsidiaries.

Subsidiaries. Subsidiaries are entities in which the Group has control. The Group controls a subsidiary if it is exposed or has rights to variable returns from its involvement with the subsidiary and has the ability to affect those returns through its power over the subsidiary. Control is generally accompanied by a shareholding of more than one-half of the voting rights. The existence and effect of potential voting rights that are substantive are considered when assessing whether the Group controls an entity. The Group reassesses whether or not it controls an entity if facts and circumstances indicate that there are changes to one or more of the three elements of control.

The financial statements of the subsidiaries are included in the consolidated financial statements from the date when the Group obtains control and continue to be consolidated until the date when such control ceases. The results of operations of the subsidiaries acquired or disposed are included in the consolidated statement of comprehensive income from the date of acquisition or up to the date of disposal, as appropriate.

The financial statements of the subsidiaries are prepared using the same reporting period of the Parent Company. Consolidated financial statements are prepared using uniform accounting policies for like transactions and other events in similar circumstances. Intercompany balances and transactions, including intercompany profits and unrealized profits and losses, are eliminated in full.

A change in ownership interest of a subsidiary, without a change in control, is accounted for as an equity transaction. Upon the loss of control, the Group derecognizes the assets (including goodwill) and liabilities of the subsidiary, any non-controlling interests and the other components of equity related to the subsidiary. Gain or loss arising from the loss of control is recognized in profit or loss. If the Group retains interest in the previous subsidiary, then such interest is measured at fair value at the date control is lost. Subsequently, it is accounted for as an equity-accounted investee or as an available-for-sale financial asset depending on the level of interest retained.

Non-controlling Interests. Non-controlling interests represent the portion of profit or loss and net assets not held by the Group, presented within equity in the consolidated statement of financial position, separately from equity attributable to equity holders of the Parent Company.

Non-controlling interests represent the interests of minority shareholders of PT IAFI, PT VDZ, Akaroa and AMHI.

3. Significant Judgments, Accounting Estimates and Assumptions

The preparation of the Group's consolidated financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenue, expenses, assets and liabilities and disclosure of contingent liabilities, at the end of the reporting period. However, uncertainty about these assumptions and estimates could result in an outcome that could require a material adjustment to the carrying amount of the asset or liability affected in the future.

While the Group believes that the assumptions are reasonable and appropriate, significant differences in the actual experience or significant changes in the assumptions may materially affect the estimated amounts. Actual results could differ from such estimates. In particular, the COVID-19 pandemic and the resulting adverse effects to the global economic conditions, as well as to the Group's operations, may impact future estimates including, but not limited to, the allowance for ECL, valuation of inventories, fair value measurements, impairment of nonfinancial assets, recognition of deferred tax assets, actuarial gains or losses on retirement benefits obligation and discount rate assumptions.

The judgments, estimates and underlying assumptions are reviewed on an ongoing basis. 14. Financial Risk Management Objectives and Policies

The Group's principal financial instruments comprise mainly of cash and cash equivalents, trade and other receivables, trade and other payables (excluding statutory payable and customers' deposit), loans payable, due to related parties and refundable lease deposits. The main purpose of these financial instruments is to finance the Group's operations.

The Group's is exposed to credit risk, market risk and liquidity risk. The Group's BOD and management review and approve the policies for managing each of the risks summarized below.

Credit Risk

Credit risk is the risk that a counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Group is exposed to credit risk from its operating activities (primarily trade receivables) and from its deposits with banks and financial institutions, foreign exchange transactions and other financial instruments.

The gross maximum exposure of the Group to credit risk before taking into consideration collateral and other credit enhancements amounted to $13.2 million and $16.0 million as of March 31, 2020 and December 31, 2019, respectively.

Risk Management. Credit risk is managed on a group basis. The Group deals only with reputable banks and customers to limit this risk. If customers are independently rated, these ratings are used. Otherwise, if there is no independent rating, the Group assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with limits set by the management. The compliance with credit limits by customers is regularly monitored by management.

As at March 31, 2020 and December 31, 2019, the carrying amounts of financial assets that are neither past due nor impaired amounted to $9.9 million and $11.5 million, respectively, and are rated as High Grade. The credit quality of the financial assets is managed by the Group using the internal credit quality ratings as follows:

High Grade. Pertains to counterparty who is not expected by the Group to default in settling its obligations, thus credit risk exposure is minimal. This normally includes large prime financial institutions and companies. Credit quality was determined based on the credit standing of the counterparty.

Standard Grade. Other financial assets not belonging to high grade financial assets are included in this category.

Substandard Grade. Substandard grade financial assets are those which are considered worthless. These are accounts which have the probability of impairment based on historical trend.

As at March 31, 2020 and December 31, 2019, the aging analysis of the Group's financial assets is as follows:

Market Risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk, foreign currency risk and other price risk, such as equity price risk and commodity risk. Financial instruments affected by market risk include loans and borrowings, deposits and debt and equity investments.

Foreign Currency Risk. Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Group's exposure to the risk of changes in foreign exchange rates relates primarily to the Group's operating activities (when revenue or expense is denominated in a foreign currency) and the Group's net investments in foreign subsidiaries.

The Group has transactional currency exposures arising from purchase and sale transactions denominated in currencies other than the reporting currency. The Group does not enter into forward contracts to hedge currency exposures.

As part of the Group's risk management policy, the Group maintains monitoring of the fluctuations in the foreign exchange rates, thus managing its foreign currency risk.

Liquidity Risk.

Liquidity risk arises from the possibility that the Group may encounter difficulties in raising funds to meet commitments from financial instruments. It may result from either the inability to sell assets quickly at fair values or failure to collect from counterparty.

The Group's objective is to maintain a balance between continuity of funding and flexibility through related party advances and aims to manage liquidity as follows:

a. To ensure that adequate funding is available at all times;

b. To meet commitments as they arise without recurring unnecessary costs; and

c. To be able to assess funding when needed at the least possible cost.

Capital Management

The primary objective of the Group's capital management is to ensure that it maintains a strong credit standing and stable capital ratios in order to support its business and maximize shareholder value. The Group maintains its current capital structure and will make adjustments, if necessary, in order to generate a reasonable level of returns to stockholders over the long term. No changes were made in the objectives, policies or processes during the year.

The Group considers the equity presented in the consolidated statements of financial position as its core capital.

The Group monitors capital using debt to equity ratio, which is total debt divided by total equity. The debt-to-equity ratio as at March 31, 2020 and December 31, 2019, follows:

	2020	2019
Debt	**$34,572,034**	$36,508,252
Equity	**31,164,484**	31,299,760
Debt-to-Equity Ratio	**$1.11:1**	$1.17:1

The Group is not subject to any externally imposed capital requirements.

Debt is composed of trade and other payables, loans payable, due to related parties and income tax payable, while equity includes share capital, reserves of the Group and non-controlling interests, less treasury shares. The computed ratios above are acceptable.

The Group reviews its capital structure on an annual basis. As part of this review, the Group considers the cost of capital and the risks associated with it.
